Getting Warm Up Here

In a letter from Pfc. Albert E. Schneider stationed in Alaska, he states that it is getting warm up there.

"Three weeks ago it was 52 degrees below zero. For the last 15 days it has been 40 degrees above."

Are there any groundhogs in Alaska, Albert?

Pfc. Schneider has the 'Star' air-mailed to him and he gets the paper on Saturday which is plenty fast. Says he doesn't want to be without the paper.
